

Introducing **TouchPayGo**, a tailored modern payment unit

A streamlined solution that simplifies the process for both operators and users

We understand the challenges faced by city maintenance personnel and parking and charging operators when it comes to EV charging.

Current parking and charging systems require users to manage multiple tags, cards, and subscriptions, making it complex and time-consuming. However, there is a growing demand for a streamlined solution that simplifies the process for both operators and users.

Key functions

TouchPayGo is a tailored modern payment unit.

- No subscriptions needed. Users can easily charge vehicles via secure credit card payment.
- Our system integrates with various EV stations.
- TouchPayGo manages payments, controls multiple stations, and withstands tough environments with its durable design.

Exceptional quality

Made in Sweden for quality, it comes in wall-mounted and ground stand variants. Beyond EV charging, TouchPayGo can also handle other payments, visitor registration, or serve as an information board. Enhance the experience with TouchPayGo – your awaited solution.

Technical specifications

Mounting	Ground or wall mounting
Dimensions	Wall mounted: 216 x 292 x 52mm (W x H x D), Ground mounted: 310 x 1666 x 99,95 mm (W x H x D)
Screen	10.1" TFT screen / IK10 rated
Card reader	Castles UPT1000F
Communication	LAN or 4G modem
Power	Mains operation 230v or optional solar operation
Identification	Registration number based
Key functions	Tokenisation / "Remember me" function, Notification when parking is ending, Online Receipt, Manages parking and EV charging in one unit.

ParkChargePay – Redefining Parking and Charging
